

# Commission on Cancer Standard 3.3

The cancer committee develops and implements a process to disseminate a treatment summary and follow-up plan to patients who have completed cancer treatment. The process is monitored and evaluated annually by the cancer committee.

## Eligible:

Analytic cases with Stage I, II, or III cancers treated with curative intent for initial cancer occurrence and who have completed active therapy

2015 –  $\geq 10\%$  of eligible pts receive SCP

2016 –  $\geq 25\%$  of eligible pts receive SCP

2017 –  $\geq 50\%$  of eligible pts receive SCP

2018 and on –  $\geq 75\%$  of eligible pts receive SCP

# CoC Programs Surveyed-2016 (2015 data)

## Patients eligible to receive a Survivorship Care Plan

Per Program Range:  
2–9,918 patients eligible  
Mean: 643 patients eligible  
Median: 289  
Interquartile Range:  
485 (Q1=126, Q3=611)

Total:  
399,859 patients eligible

## Patients receiving a Survivorship Care Plan

Per Program Range:  
0–7,572 patients received  
Median: 50  
Interquartile Range:  
85 (Q1=24, Q3=109)  
Total:  
79,120 patients received SCPs

20% received SCP

237,000 across 1500 CoC  
accredited hospitals

# What is the Road Forward?

---

- Are SCPs feasible in the real world?
- Are SCPs a good measure of a survivorship program?
- Should we maintain the requirement to deliver SCPs?
- Should we review components of survivorship care at each program?
- What are scientific data to support these standards?
