BIOGRAPHIES

Jo Ivey Boufford, M.D., is co-chair of the Forum on Public-Private Partnerships for Global Health and Safety and immediate past President of The New York Academy of Medicine. Effective January 1, 2018, she is a Clinical Professor of Global Public Health at the College of Global Public Health at New York University where she is also Professor of Public Service, Health Policy and Management at the Robert F. Wagner Graduate School of Public Service and Clinical Professor of Pediatrics at New York University School of Medicine. She served as Dean of the Robert F. Wagner Graduate School of Public Service at New York University from June 1997 to November 2002. Prior to that, she served as Principal Deputy Assistant Secretary for Health in the U.S. Department of Health and Human Services (HHS) from November 1993 to January 1997, and as Acting Assistant Secretary from January 1997 to May 1997. While at HHS, she was the U.S. representative on the Executive Board of the World Health Organization (WHO) from 1994–1997. She served in a variety of senior positions and as President of the New York City Health and Hospitals Corporation (HHC), the largest municipal system in the United States, from December 1985 until October 1989. Dr. Boufford was awarded a Robert Wood Johnson Health Policy Fellowship at the National Academy of Medicine (formerly known as the Institute of Medicine) in Washington, D.C. for 1979–1980. She currently serves on the boards of the United Hospital Fund and the Health Effects Institute. She was elected to membership in the National Academy of Medicine in 1992 and served on its Board on Global Health and Board on African Science Academy Development. She served two four year terms as the Foreign Secretary of the National Academy of Medicine between 2010 and 2014 and was elected to membership for the National Academy of Public Administration in 2015. She received Honorary Doctorate of Science degrees from the State University of New York, Brooklyn, (1992), New York Medical College, (2007), Pace University, (2011) and Toledo University, (2012). She has been a Fellow of The New York Academy of Medicine since 1988 and a Trustee since 2004. Dr. Boufford attended Wellesley College for two years and received her B.A. (Psychology) magna cum laude from the University of Michigan, and her M.D., with distinction, from the University of Michigan Medical School. She is Board Certified in pediatrics.

Ambassador (Ret.) John E. Lange, J.D., M.S., is the Senior Fellow for Global Health Diplomacy at the United Nations Foundation. Prior to joining the Foundation in July 2013, Ambassador Lange spent four years at the Bill & Melinda Gates Foundation working with African governments to improve public health. He has served as co-chair of the Global Polio Eradication Initiative's Polio Partners Group since its launch in April 2012. He also served as co-chair of the National Academies of Sciences, Engineering, and Medicine's Committee on Investing in Health Systems in Low- and Middle-Income Countries. Ambassador Lange had a 28-year career in the Foreign Service at the U.S. Department of State, including service as Special Representative on Avian and Pandemic Influenza; Deputy U.S. Global AIDS Coordinator at the inception of the President's Emergency Plan for AIDS Relief; and Ambassador to Botswana. He led the U.S. Embassy in Dar es Salaam during the August 7, 1998, terrorist bombing, for which he received the State Department's Distinguished Honor Award. Ambassador Lange managed humanitarian and refugee assistance while serving at the U.S. Mission to the UN in Geneva and earlier had tours of duty at U.S. Embassies in Togo, France and Mexico. Prior to joining the diplomatic service in 1981, he worked for five years at the UN Association of the USA in New York. Ambassador Lange has written numerous articles, including an account of pandemic influenza negotiations for a book of case studies in global health diplomacy. He has degrees from the National War College, the University of Wisconsin Law School and the University of Wisconsin-Madison and has studied at The Hague Academy of International Law. He speaks English and Spanish and has working proficiency in French.

Deena L. Buford, M.D., M.Sc., is currently the Global Medical Director of the Medicine and Occupational Health Department for Exxon Mobil Corporation. The department delivers services to over 80,000 ExxonMobil and affiliate employees worldwide. In addition to traditional work-related occupational health services, their service portfolio includes emergency response, travel medicine, industrial hygiene, drug testing, infectious disease support and health promotion services delivered across a global network of over 90 clinics.

Dr. Buford completed her undergraduate education at Duke University obtaining degrees in Psychology and Chemistry. While at Duke, she received an undergraduate research grant from the Department of Neuroanatomy and her work contributed to a publication in the Journal of Comparative Neurology. She attended medical school at Meharry Medical College in Nashville, Tennessee, completed a residency in Occupational Medicine and obtained a Master's of Science in Public Health at the same institution. She is board certified in Occupational Medicine.

Dr. Buford is a member of the Alpha Omega Alpha Medical Honor Society, the American College of Occupational and Environmental Medicine (ACOEM) and the American Public Health Association. She also serves on the Society of Petroleum Engineers Health, Safety, Security, Environmental and Social Responsibility Committee and the International Corporate Health Leadership Council.

Jennifer Esposito, M.S., is an executive with over 20 years of experience in the global healthcare IT, health and life sciences industry. Ms. Esposito worked for over 13 years at GE Healthcare and is now Worldwide General Manager of Health and Life Sciences at Intel Corporation. Ms. Esposito has led commercial organizations, sales, marketing and service operations, P&Ls, as well as both upstream and downstream strategy and marketing – in all cases driving new business growth and organizational transformation. Ms. Esposito has extensive experience working with governments, intergovernmental agencies, industry organizations and others to influence and drive policy related to the use of information and communication technologies (ICT) in healthcare and health security.

At Intel, Ms. Esposito leads a worldwide team of industry and technology leaders, subject matter experts, account executives, scale managers, industry technical specialists and solution architects to develop solutions that use information and communication technology to solve the most pressing challenges facing the health and life sciences industry (e.g., making personalized medicine a practical reality, securing health systems from data breaches, and integrating digital solutions in hospitals and health systems to improve care, access, and lower costs).

Together with the Novartis Foundation, Ms. Esposito co-chairs the UN Broadband Commission for Sustainable Development's Working Group on Digital Health for Non Communicable Diseases (NCDs). Ms. Esposito is on the Steering Committee of the Global Health Security Agenda Private Sector Roundtable (PSRT) and Chair's the PSRT's Technology and Analytics Working Group.

Ms. Esposito holds a graduate degree in Epidemiology and Biostatistics from the Dartmouth Institute for Health Policy and Clinical Practice and a B.A. from Dartmouth College. Ms. Esposito is a certified Six Sigma Black Belt and is a member of the American Association of Physicists in Medicine.

Renuka Gadde, M.B.A., has 14 years of work experience with Becton, Dickinson and Company (BD), which is a medical devices and diagnostics company. In her current role, she works with international agencies, thought leaders and governments to strengthen medical and clinical practices around the world. Her role focuses on reaching and creating access to the un-served and underserved populations in the developing and emerging markets. Prior to her current role, Ms. Gadde was leading the Emerging Markets Injection Safety platform at BD. During this period, she interacted with several international agencies and governments and played a key role in the formulation of safe injection policies that protect the patient and health care workers. She was also instrumental for developing unique product solutions specifically suited for the emerging markets and was the key contact for UNICEF supplies in Copenhagen

and for driving programs and policies with UNICEF, NY. Her current focus is to establish appropriate policies and standards for safe blood collection and to drive public-private partnerships that improve practices and conditions across a wide range of health initiatives such as HIV, cancer and TB. As part of the Global Health team, Ms. Gadde has developed several key public-private partnerships that improve clinical practices and build capabilities within countries. Key programs she has led include developing four partnerships with PEPFAR, with the International Council of Nurses and UNICEF. All of these partnerships aim to strengthen health systems and improve health care capacity across Sub-Saharan Africa. Ms. Gadde has extensively traveled across many of the developing and emerging markets and has a deep understanding of the challenges in these markets.

Trevor Gunn, Ph.D., is Vice President- International Relations for Medtronic, the world's largest medical technology company. He was formerly long-time Director of the Commerce Department's Business Information Service for the Newly Independent States (BISNIS) the clearinghouse for US Government information for doing business in the former Soviet Union. He has served continuously for the past 21 years as Adjunct Professor at CERES/School of Foreign Service, Georgetown University. He is a Vicennial Silver Medalist. He received his B.A. from University of San Francisco and his Ph.D. in International Relations from the London School of Economics in 1992. He has worked with the Chamber of Commerce of Southern Sweden, Dover Elevator Corporation (now ThyssenKrupp of Germany), International Executive Service Corps and on the staffs of the former San Francisco Mayor and two U.S. Senators from California. He sits on the U.S. State Department's Advisory Committee on International Economic Policy; is an official Trade Advisor to the Office of the US Trade Representative (USTR) in the "Industry Trade Advisory" system of the US Government. Further, he is a Member the Board of Directors for the US-Russia Business Council, the Washington Export Council (Washington, D.C.), the Board of Advisers of the Washington International Business Council, the Board of Directors of the Executive Council on Diplomacy and the Board of the Center for Citizens Initiatives (San Francisco) and on the Board of Advisors of the University of Wisconsin (Madison)'s CIBER (International Business) program. Equally, he is a member of the National Academy of Sciences, Engineering, and Medicine's, "Forum on Public-Private Partnerships for Global Health" and is a member of the U.S. Department of Commerce's District Export Council (Virginia). Dr. Gunn speaks Swedish, French and Russian. Dr. Gunn, his wife and their three children live in Suburban Maryland, a short distance from Washington, D.C.

Amy Lin, M.B.A., M.A., is the Market Access Team Lead and a Senior Advisor in USAID's Center for Accelerating Innovation and Impact (CII), where she focuses on market-based strategies like introduction planning, market shaping and innovative financing to accelerate adoption of high-priority health interventions. Previously, Amy was based in Mumbai with Monitor Inclusive Markets, where she developed social enterprise models that provide clean drinking water in slums. Prior to this role, Amy served as the HIV/AIDS Program Director for the Clinton Health Access Initiative (CHAI) in Liberia. Before CHAI, Amy was at the World Bank's Development Marketplace, which funds new approaches to serving the poor.

Previously, Amy worked with TechnoServe in Peru, advising microbusinesses on expansion, marketing, and operational strategies to target new customer segments. Earlier, Amy was based in New York with the Boston Consulting Group (BCG), a strategy consulting firm, where she advised multinational companies in the pharmaceutical, financial services, and consumer goods industries. Amy holds an MBA from the Wharton School of the University of Pennsylvania, an MA in International Relations from the Johns Hopkins School of Advanced International Studies (SAIS), and a BA with Distinction in Political Science from Yale University.

Scott C. Ratzan, M.D., M.P.A., is President of the AB InBev Foundation. He joined AB InBev in 2013 as VP, Global Corporate Affairs and later served as VP, Global Health & Social Impact. In these roles, he serves as architect of AB InBev's Global Smart Drinking Goals and also developed other global initiatives including Together for Safer Roads, a broad based coalition to save lives from road crashes. Scott's contributions to improve public health domestically and internationally include pioneering projects and publishing in the areas of health literacy, mobile health (mHealth) communication and global health diplomacy. He co-authored the definition of health literacy that is the foundation of U.S. efforts including the Affordable Care Act. Since 1994, he has served as the Editor-in-Chief of the peer-reviewed Journal of Health Communication: International Perspectives. He currently is a member of the US National Academies of Medicine Forum on Public-Private Partnerships on Global Health and Safety as well as on the Advisory Board for the Massachusetts General Hospital Center for Global Health, RAND Health and World Information Transfer (a NGO in consultative status to the UN).

Katherine A. Taylor, Ph.D., M.Sc., is Associate Director and Director of Global Health Training, Eck Institute for Global Health, University of Notre Dame. Trained as a parasite immunologist, Taylor's research experience includes 14 years living and working in Kenya where she was employed by the US Centers for Disease Control and the International Livestock Research Institute focused on malaria and trypanosomiasis in livestock. She joined the National Institute of Allergy and Infectious Diseases in 2001. There she established and led a new Drug Development Section within the Office of Biodefense that funded a portfolio of contracts for the development of new drugs against high priority biothreats (e.g. smallpox, anthrax, and botulinum toxin). In 2009 she joined the University of Notre Dame's Eck Institute for Global Health. Taylor manages a number of international research relationships across a range of geographic locations, partners and activities. Taylor also serves as the Director of Global Health Training, with primary responsibility for establishing and now leading the Master of Science in Global Health program. She is a past-President of the ASTMH Committee for Global Health and a member of the National Academies of Sciences, Engineering, and Medicine's (previously the Institute of Medicine) Forum for Public Private Partnerships for Global Health and Safety. She serves on the Advisory Board of Catholic Medical Mission Board and on the Catholic Health Association International Outreach Committee.

Chris West, Ph.D., has a background in both business and development. Prior to co-founding Sumerian Foundation, he was Director of the Shell Foundation. While at Shell Foundation, Chris pioneered an "enterprise" based approach to philanthropy prior to the emergence of "impact investing". During his time as Director of Shell Foundation he co-created and scaled up over 20 of the world's leading "social enterprises". He received the World CSR award for "Social Innovation" in 2013 with respect to his role in setting up diverse successful public private partnerships. Chris completed his Doctorate in Ecology at Oxford University and then set up a business in the environmental services sector. Following the sale of this company he was appointed senior environment adviser at the UK's Department for International Development (DFID). He has worked in over 100 emerging economies and has lived in both West and East Africa.
