Committee Members

• Linda McCauley, Emory University (Co-Chair)
• Asaf Bitton, Ariadne Labs
• Tumaini Coker, University of Washington School of Medicine and Seattle Children’s
• Carrie Colla, Geisel School of Medicine at Dartmouth
• Molly Cooke, University of California, San Francisco
• Jennifer DeVoe, Oregon Health & Science University
• Rebecca Etz, Virginia Commonwealth University
• Jackson Griggs, Heart of Texas Community Health Center, Inc.
• Shawna Hudson, Rutgers University
• Robert Phillips, Jr., American Board of Family Medicine (Co-Chair)
• Shreya Kangovi, University of Pennsylvania
• Christopher Koller, Milbank Memorial Fund
• Alexander Krist, Virginia Commonwealth University
• Luci Leykum, University of Texas at Austin
• Mary McClurg, University of North Carolina at Chapel Hill
• Benjamin Olmedo, Dignity Health
• Brenda Reiss-Brennan, Intermountain Healthcare
• Hector Rodriguez, University of California, Berkeley

Consultant: Susan Fisher-Owens, University of California, San Francisco
Staff: Marc Meisnere, Sharyl Nass, Tracy Lustig, Sarah Robinson, Cyndi Trang, and Samira Abbas

Statement of Task

NASEM will examine the current state of primary care in the United States and develop an implementation plan to build upon the recommendations from the 1996 IOM report, "Primary Care: America's Health in a New Era", to strengthen primary care services in the United States, especially for underserved populations, and to inform primary care systems around the world. The implementation plan will consider:

- **Barriers to and enablers of innovation** and change to achieve high-quality, high-value primary care;
- The expanding scope of comprehensive primary care integration to address the needs of individuals, families, and communities;
- The role of primary care in achieving population health outcomes and health equity goals;
- The role of team-based interprofessional practice and the range of primary care providers, including those with oral health, lifestyle, and integrative medicine expertise;
The evolving role of technological and other innovations in delivering patient-centered primary care;
Education and training needs for the **changing workforce** in primary care;
The evolution and sustainability of **care delivery and payment models** across different communities and care settings;
Efficient approaches to meaningful measurement and continuous **improvement of care quality**;
Changing demographics and the primary care needs and access of **different patient populations**, including rural and other underserved populations;
Identifying and addressing **behavioral and social determinants of health** and delivering community oriented, whole person care; and
The infrastructure needed to evaluate effectiveness of innovation and its impact on health outcomes and to **support data-informed decision-making**.
To develop the implementation plan, the committee will consider successes and limitations of prior efforts to innovate in primary care, as well as the increasing demands and stresses on the primary care system, and will recommend ways to effectively scale and implement successful innovations and programs in US health care settings.
Agenda

1:10 PM    Invited Presentations From Sponsors of the Study
4:10       Committee Questions and Comments
4:30       1996 IOM Report Highlights
5:00       Committee Questions and Comments
5:20       Comments From the Public
5:30 PM    Adjourn Open Session
Reminders

- Open, on-the-record session
- Reporters can contact the study director
- Information-gathering session
- No conclusions at this time
- Rigorous report review process
- Public comments can be sent to primarycare@nas.edu
