

ACTION COLLABORATIVE

ON BUSINESS ENGAGEMENT IN BUILDING HEALTHY COMMUNITIES

Call for Case Stories | Chambers of Commerce

The [Action Collaborative on Business Engagement in Building Healthy Communities](#) (the Business Collaborative), recognizes that Chambers of Commerce play an array of roles in building healthy communities. In an effort to highlight instances where Chambers are active participants or leaders in promoting community health and well-being, the Business Collaborative is launching a call for “case-stories” from Chambers of Commerce across the nation that describe their involvement in such endeavors.

In partnership with FTI Consulting Inc., the Business Collaborative hopes to build a body of these accounts and release them via a web-based publication on a rolling-basis. The goal of featuring existing work is to enhance the understanding of business collaboration with other sectors to improve community health/well-being and thereby inspire other chambers to engage in, or support, such endeavors in their own communities. There is so much happening across the nation in this area and we hope to be able to capture and share an illustrative sampling of contributions made to community health and well-being by the business sector.

If you would like to participate, please click [here](#) .

[Here](#) you will find a preview of the questions in a PDF document so that you may prepare the answers in advance and submit through survey gizmo (the link above) at your convenience. If you have any questions please contact me.

We kindly ask that if you know a Chamber of Commerce leader who may be interested in submitting a case-story that you please share this email. Thank you for your time.
