

2016 YEAR IN REVIEW

ROUNDTABLE ON POPULATION HEALTH IMPROVEMENT

VISION & MISSION

The Roundtable's vision is of a strong, healthful, and productive society that cultivates human capital and equal opportunity. This vision rests on the recognition that outcomes such as improved life expectancy, quality of life, and health for all are shaped by interdependent social, economic, environmental, genetic, behavioral, and health care factors. Altering these factors will require robust national and community-based actions and dependable resources to achieve them.

The Roundtable intends to catalyze urgently needed action toward a stronger, more healthful, and more productive society. The Roundtable will therefore facilitate sustainable collaborative action by a community of science-informed leaders in public health, health care, business, education, and early childhood development, housing, agriculture, transportation, economic development, and non-profit and faith-based organizations.

MEMBERS

The Roundtable comprises 34 members from academia (with expertise including social sciences and economics), business, foundations, all levels of government, health care, and non-profit organizations.

COMMUNICATION

A 3-minute [video](#) orients audiences to the meaning of population health in the words of some of our members.

All workshops are webcast and archived on the roundtable webpage (click on [Multimedia](#)).

STRATEGY & APPROACH

To achieve the vision of a strong, healthful, and productive society, the Roundtable's workshops and other activities are intended to catalyze the following conditions for influence:

Resources *Relationships*
Communication *Policy*
Measures *Research*

The Roundtable's work frames issues, raises awareness, generates urgency, poses questions, reveals opportunities, elevates exemplars, informs the identification of priorities, and explores norms/standards.

RELATIONSHIPS

Relationships—across sectors and systems and within communities—are key to any effort to improving population health. Roundtable members participate in several national conversations that help to disseminate the Roundtable's work. Roundtable workshops also serve to build relationships that advance the conversation and inform new efforts in the field.

2016 BY THE NUMBERS

4 WORKSHOPS

- Framing the Dialogue on Race and Ethnicity to Advance Health Equity (February) in Washington, DC
- Community Violence as a Population Health Issue (June) in Brooklyn, NYC
- Building Sustainable Financing Structures for Population Health (October) in Washington, DC
- Exploring the Infrastructure of Multisector Community Health Partnerships (December) in Oakland, CA

4 WORKSHOP PRODUCTS

- Community Violence as a Population Health Issue: Proceedings of a Workshop—in Brief
- Advancing the Science to Improve Population Health: Proceedings of a Workshop
- Framing the Dialogue on Race and Ethnicity to Advance Health Equity: Proceedings of a Workshop
- Metrics that Matter for Population Health Action: Workshop Summary

17 PERSPECTIVES

Perspectives are individually authored expert commentaries and discussion papers by leading voices in health and health care and are posted by the National Academy of Medicine (NAM). Ideas emerged from the Roundtable's workshops or are related to the conditions for influence described above, but these views have not been subject to the National Academies review process and are not necessarily endorsed by the NAM or the National Academies.
