# Liberating Structures

In light of what you've heard today, what is the single most important principle or lesson learned about forging productive collaborations between faith-based groups, public health and healthcare systems?

Take 2 minutes and legibly write your response on an index card. Keep it relatively short and pithy.

25-10 Crowdsourcing

- Each person writes their concrete,

  actionable ideas on a card

- When the music starts, pass cards rapidly while milling and bring your pen

- When the music stops, read the idea and then rate the card you hold: 1 =

  ho-hum to 5 = fabulous, "I'm in!"

- Decide <u>before</u> looking at other scores.

  Put rating on the back of the card

  REPEAT

  5 ROUNDS

When your card has received 5 scores, sit down in your seat, sum your card's numbers and write that number on the back of the card.
